BIG ASSEMBLAGE

Exhibition Will Prove Surprise to Those Who Visit Galleries.

Everybody knows the etching of Burgon Cathedral" by Axel Herman Hair thousands of people, who have not travelled, hold the famous edifice in affectionate regard by means of the reproductions of this print that are scattered over the land. Of the original but \$60 copies were printed, and one of the very best of these impressions hold a place of honor in the John Boland collection of Axel Herman Haig etchings, new on view in the American Art Association galleries.

The many enthusiasts for the work of Haig-and it is hard to cite a living etcher who is more truly popular—will enjoy a comparison of their own possessions with the carefully chosen examples that Mr. Boland has been collecting since 1883. It not only has the "Burgos," the "Toledo," the "Amiens" and the "Mont St. Michel" that are familiar to all, but an astontshingly complete assemblage of all the artist's works. There are known to be 230 complete assemblage of all the artist's works. There are known to be 230 plates in all from Haig's hands and imbressions from all but one of these may be found listed in this exhibition. To collectors great interest will attach to a small etching of a windmill made at Bruge in 1877 and which has an attestation upon the margin by the artist to, the effect that it is his first attempt at etching. This etching was apparently at etching. This etching was apparently made on a plate over another etching of maint, traces of which, in the clouds are still to be seen. Among the 220 impressions are many other early per-formances and many small prints, that

they are but rarely seen.

The interior of this cathedral provides Haig with one of his most admired sub-jects, "In the Aisles."
